### What's New in the AutoCAD?

**Interactivity:** Automatically generate 3D and 2D views when you draw or insert a text string. Edit and export with the new 2D Wireframe Viewer. Generate a view from a 3D model with the new 2D Snap to Viewer. **Vector Alignment:** View B-splines and explore the history of your vector geometry. Use the new View B-spline options to define curves that are smooth, closed, or smooth and closed, or to control the number of connected segments. **Indicate Areas:** Re-create the old Area Select tool using the new “click-select-remove” method. Select an area by clicking its location in a drawing or select a shape and specify its area using the new Select Area command. This provides a means to scale the area by viewing a transformation or compare a two areas (video: 1:32 min.). **Building Blocks:** Create and manipulate block objects using a robust system that allows you to draw and convert any shape to a block object. You can also send the new block object to a tool for editing. **Extensible Charts:** Edit multiple lines of math equations at once and easily create a new equation from any existing expression. You can also create charts that automatically update when data changes. (video: 1:18 min.) **Selection-Based Viewers:** View a 2D document, including sections, by using the new “click-select-view” method. Drag and drop objects directly on the viewer canvas. Drag a section to view. Drag an object to view a section. Drag an object to replace a section. **“AutoCAD Block” Configuration:** Create and save your own Block definitions with the new Configure Block window. **Search:** Search for drawing features using the new Find command. Search for a shape, tool, or drawing feature, and the search results highlight matching objects. **Change Preview Scale:** The new Change Preview Scale command allows you to switch to a specified unit, such as feet, meters, or picas. The preview scale is adjusted automatically to show you the new unit. **Perspective Snap:** Use the new Perspective Snap to create a drawing that is viewable from any angle and show both “active” and “secondary” axes.
