Hey Hey! Are you looking for a simple tool to generate random and unique passwords? Aren't you sick of the passwords generated by default? Don't you want something that will generate random, strong passwords for your needs? You are in the right place! This is a simple to use program that generates one of the best and strongest passwords for your needs. Using this tool will generate nearly 100 passwords of various lengths and complexity, suitable to be used everywhere. You can be sure that you are using a strong password and there is no doubt about it. You can forget about the simpler and insecure passwords, because in this case there is no use for them. You will see that this is a tool you need to use in order to have a proper and strong password. It has never been easier to create strong, random and complex passwords. This tool will make it a lot easier for you. You do not need to have any programming skills in order to use it. Its interface is simple and easy to use. When you start using this tool, you will get a sense of how this password generator works. It is so easy to use, so you can use this tool whenever you need it and in any condition. In order to create a new password, just enter the number of characters you want, the length of the password, and the complexity required. The more options and characteristics the better it is for creating new and unique passwords. You can also generate a password using different methods and options. You can use the '7 plus' option in order to include special characteristics that will make the password even more strong. Plus, if you don't like some of the generated passwords, you can skip them as they won't be used to generate another one. This is a very useful tool to use in order to generate strong passwords that are easy to remember. In case you are not interested in the human factor, you can use the 'Algorithm' option. The special algorithms that it uses will ensure that it will create strong and unique passwords for you. Its algorithms are 'Sha1', 'md5', and others. Using this option is very useful as you do not need to enter the number of characters you want, nor the complexity you want. There are also algorithms that will allow you to use special characters in the generated passwords. You can use them in different combinations. The use of these special characters will make the generated passwords

It works just like the Clipboard Buffer found in Windows, but it comes with more features, such as an automatic locking system that will lock your clipboard strings and will ask for a password if it detects an attempt to modify them. With just a single push of a button, all your clipboard strings are transferred to an editable text box. Once saved to a text file, they can be modified, formatted, cut and pasted just as easily as Windows' built-in Clipboard. Clipboard Manager also allows you to customize almost all the windows buttons and menus through a new user friendly interface. What's more, it also provides a quick and simple clipboard history manager that allows you to easily rewind or roll-forward your entire clipboard history through a simple button click. Conclusion All in all, Clipboard Manager can prove a useful application for all users and especially for all Windows users that want to enhance their use of
