The structure is similar except for the table/column names and data. I've a user-defined STRING column called 'City' in the first database containing this data: 'DETROIT', 'TACOMA' It's a multi-value string in the second database with the same data, but a different set of values: 'DETROIT', 'TACOMA', 'BOSTON' I need to convert the second value to the first value. My solution: BEGIN TRAN T UPDATE MyTable SET MyCity = (SELECT CITY FROM MyTable A WHERE A.City IN ('DETROIT', 'TAC 3e33713323
