- Import and export videos, photos, and music from PC to the phone - Automatically synchronize files from phone to PC - Organize, copy and delete multimedia files on your Windows Phone - View video statistics on-screen - Change the default name of your phone - Manage all the data on your phone - Playlists and videos ringtones - Automatically resize images before copying them to the phone - Easily change your music ringtones - Quickly view your device storage space Description The Windows Phone 8.1 application is a utility designed to import and export files from your Windows Phone device. With this app you can copy the multimedia files to your Windows Phone, as well as create a backup copy. Once you have everything you want to save on your handset, you can transfer them to your PC or email them. With this utility, you can also choose what files you want to back up, and how much space they will take on your Windows Phone handset. Windows Phone Backup can automatically back up your apps, photos, video, music and ringtones. However, it will not back up multimedia that has been sent to your phone by a messaging app like Skype, or to a microSD card. In addition, you can also export all the audio files on your Windows Phone to a folder in your personal space on the PC. When you first run the app, you will be asked to name the device you want to back up. After that, you will be able to choose how much space you want to allocate to the backup. You will also be prompted to choose what data you want to back up, such as ringtones, pictures, videos, videos, or apps. In addition, the Windows Phone 8.1 app supports all the multimedia file formats that are supported by the phone. It is the only Windows Phone app that can import and export videos, music and photos from iTunes to the phone. You can use the app to select what you want to import, as well as choose how much space you want to allocate to each folder. You can also choose how long you want to back up the files on the phone, and choose which folders you want to back up. Once you have created the backup, you can find the backup file in the Photos, Videos, and Pictures section of the phone. You will also be given a link to the backup file, and you can share this link on social media. In addition, you can choose whether to backup only a selection of the data on the phone, or the whole phone. Windows Phone 8.1 features include the ability to customize your phone name, so you can use it on Facebook and other social media platforms. You can also choose to synchronize the media files that you store on your Windows Phone to your PC, and you can also do the reverse - copy the files stored on the phone to the PC. To add the
