More than a file manager - FileCenter is a document management solution for your company, your family, your network and your cloud. FileCenter is the most powerful, easy to use, and most customizable solution for your files and folders. All in one place and packed with powerful features, FileCenter is the secure document management solution for everyone and every use case. FileCenter, built by the team behind Backup & Recovery, revolutionizes file management, so you can spend less time managing and more time using your files. With FileCenter, you can search your documents, review where your files are stored, and keep track of their size, owners, and latest activity. Key Features: • Network Backup – Create encrypted file backups of all your files and directories. • File Center for Windows - Backup & Recovery's award-winning FileCenter is now available for Windows, free and completely free for the first year. • FileCenter App for Android - Get FileCenter's free Android FileCenter app for your Android smartphone or tablet. • FileCenter for Mac - FileCenter for Mac is an award-winning cloud-based solution that keeps your files organized and secure. • Cloud Backup - Use your Microsoft account or Google Drive to upload your files to the cloud and back them up. • File Vault - Keep your most sensitive documents and your entire network in one place by using FileVault. • Document Scanning - Scan a document, page or photo to create a searchable PDF, DOC, or JPG file. • File Sharing - Easily share your files on the web or across your network. • Share Anywhere - Share files with friends and family or work colleagues via e-mail, Dropbox, OneDrive, FTP, and more. • Attach to E-mail - Attach files to an e-mail message and send them in one click. • Document Manager - Use Docs to Manage Any File Type. • Mobile and Cloud - Edit and view files and folders on mobile devices and online. • OneDrive - View and edit documents on any device or online with OneDrive cloud storage. • Schedule Sync - Sync your documents at specific intervals. • Password Protect - Password protect any file or directory, or protect entire folders. • Find & Go - Easily find any file or directory with a simple keyword search. • Capture PDFs - Capture any document, page or photo as a searchable PDF, DOC, or JPG file

FileCenter Professional Plus License Key

The KEYMACRO is a program for Mac OS, macOS and iOS which enables you to create your own keyboard shortcuts, therefore speeding up your daily work. The software is very easy to use, which is why it is also one of the best free keyboard shortcut program around. It is made up of a really user-friendly interface, which lets you quickly create shortcuts and share them with other users, by means of social media. This software application is designed in order to make your daily task a whole lot easier. Using a mouse is no longer necessary, you can use the keyboard as the primary method of operating, as the application also supports third-party applications and devices, including Windows and Linux operating systems. Besides creating shortcuts, the software also helps you set up to-do lists, as well as attach notes to your creations. It works in the background and does not get in the way, which is why it is one of the best free keyboard shortcut programs around. The software package offers several features which are pretty impressive, including a very easy to use interface, and the ability to make shortcuts, edit them, set up tasks, attach notes to shortcuts, share them, log them and more. In addition to that, the software has a simple yet effective design. You can also create and use groups of shortcuts, thus making your keyboard shortcuts even more useful. One of the most convenient features is the system's auto-save function, which automatically saves your work, and auto-loads your new shortcut. The software has the ability to auto-complete your commands by adding a simple "+" character. You can also add your own custom keybinds, thus allowing you to perform your work in your own preferred manner. Another great thing about this software package is the availability of a huge library of skins, which you can browse through and use. Additionally, you can add a keyboard theme, which helps you customize the appearance of the app. You can also make custom shortcuts by means of drag-and-drop, which is pretty convenient. In conclusion, we really like the software's ability to make your keyboard shortcuts more convenient. The software package is pretty simple to use, and allows you to create shortcut combinations very quickly. KEYMACRO Categories: The KEYMACRO is a program for Mac OS, macOS and iOS which enables you to create your own keyboard shortcuts, therefore speeding up your daily work. What's New in the FileCenter Professional Plus?

FileCenter is a complex software application, designed specifically in order to help individuals organize documents and directories from their hard drive, as well as manage their cloud from the desktop. The interface is highly intuitive and has a modern design, built on several tabs, thus allowing users to easily browse through all the options available, such as the inbox, managing center, various file editors and a search function. The latter tool enables you to look everywhere on the hard drive, according to user-input keywords, chosen file formats and created or modified dates. Results will be displayed in a list, along with details such as name, size, item type and path. This software utility lets you toggle a file preview panel in any tab, therefore enhancing ease of use. Moreover, you can scan items to Word or e-mail, directly from the main window, as well as open, split, print and password protect PDFs. FileCenter incorporates an Optical Character Recognition (OCR) function, which lets users transform scanned written text into a searchable PDF or DOC. There is also a tab dedicated to editing TIFFs and PDFs. Here you can add a digital signature, rotate documents, take snapshots, highlight areas, cross out or underline text, attach other files as comments, erase items and use built-in stamps. The settings panel lets you configure the startup view and number of maximum search results, choose a theme, show item count footers, force conversions to TIF as black-and-white, limit OCR to a user-input number of pages, and the list goes on. In conclusion, FileCenter is a useful piece of software which does not put a strain on your computer's performance. It is cloud compatible and there are extensive Help contents you can check out (video tutorials, classical files, tips). FileCenter is a complex software application, designed specifically in order to help individuals organize documents and directories from their hard drive, as well as manage their cloud from the desktop.
