In the 13 years since its initial release, AutoCAD has gone through several major revisions, with the first major upgrade to AutoCAD released in October 1991 (AutoCAD version 1.5) and the last

major upgrade in 2009 (AutoCAD 2009). Over the years, AutoCAD has had two distinct major product lines: AutoCAD LT (formerly known as AutoCAD for Windows), the low-cost, hobbyist version of AutoCAD with limited functionality and AutoCAD 2009 for AutoCAD LT, which is the full version of AutoCAD. AutoCAD LT 2012 and

AutoCAD 2013 are the first major upgrades to AutoCAD LT in decades. The 2009 release was the last update of AutoCAD before its transition to a subscription-based software-as-a-service (SaaS) offering called Autodesk Design Suite. In May 2015, Autodesk announced a new line of AutoCAD products, designed to address the

design needs of the non-CAD professional, and AutoCAD LT for Autodesk Design Suite and Autodesk Architectural Design Suite. AutoCAD LT 2017 is the last major release of AutoCAD LT for non-professional users.

AutoCAD LT 2017

AutoCAD LT 2017, available in beta form as of May 25, 2016, was the last major release of

AutoCAD LT before its transition to a subscription-based software-as-a-service (SaaS) offering called Autodesk Design Suite. The 2017 release includes a completely redesigned user interface and features a new open-source, feature-complete "Build" product, which was previously only available as an "insider"

customer product. The beta release also includes a new feature called "Easy Drawing." This new feature enables users to build upon a previously drawn object with other objects. Other 2017 release features include:

- Bucket Fill (formerly Bucket Grab)
- 3D Isometric Batch Path
- Bucket Path Box Selection
- Community Widget

Microsoft Windows, developed in the 1990s as an office productivity application, supports programming through Visual Basic for Applications (VBA), Visual LISP, Visual C++, Borland Delphi, Microsoft Visual C# and .NET languages. VBA has been the most widely used because of its easy accessibility, while C# is available only on

the Microsoft Windows operating systems. AutoCAD Free Download LT, which is licensed for use on Windows and Mac systems, uses VBA macros as its default programming language. Scripting languages AutoLISP and Visual LISP are not supported by AutoCAD LT. In addition to visual programming languages, AutoCAD LT

supports AutoLISP, Visual Basic for Applications, Visual C++, .NET, Borland Delphi, PASCAL, and Python for ArcInfo with the acadcom module. Other programming languages and editors Other programming languages are: AutoLISP, which is based on the Macro package and is supported in AutoCAD LT. Visual Basic for Applications

(VBA) and its sub-languages Visual Basic for Applications for ArcInfo and Visual Basic for Application for AutoCAD are also used for programming in AutoCAD. Delphi is used by the partners of AutoCAD. Python for ArcInfo PASIS, which was developed for AutoCAD. PASIS is compatible with Visual C++, Visual Basic for

softwareQ: Assigning innerHTML not working in IE8 I have a problem with assigning innerHTML with

some values to a div element. The element has a css class named "custom-tooltip" and this css works fine in every browser I tried, except IE8, where it does not. This might be because of the line with the hover event in the css. This line says: ca3bfb1094
