## What's New In?

CnWizards is for Delphi and C++Builder. It's the first and the only IDE Plug-In tool with an integrated project extension framework ( designed to provide standard IDE based UI mechanism for each project type), a software debugger, and an external wizard management tool. CnWizards has the following advantages: Set this as your first run application, will import all your previous projects, and will align your projects with the latest IDE version. The application will also create your new project according to your current IDE projects, and drag new project from the decompiled DFM/DFM view into the IDE, the application will convert your projects to the latest IDE format automatically, the application can backup and restore your whole projects. CnWizards is designed for Delphi, C++Builder and RAD Studio 2007 with free edition. For Delphi and C++Builder, it is a great IDE Plug-in application with eight independent tools and a lot of enhancements. CnWizards supports CnPack and CnWizards installation files. For installation file, you should download the installation file, select Add to Program/ Add to Programs... under Tools menu in Delphi or select CnWizards from Programs menu in C++Builder. Then move the CnWizards installation file to your Program Files(32bit) folder or Program Files(64bit) folder. Or run CnWizards in the command line. Since Version 1.8, CnWizards can import DFM files under Delphi 2007, which can only be drag and drop into the CnWizards IDE. If the CnWizards cannot display in the environment of your Delphi or C++Builder, it is recommended that you uninstall CnWizards from the computer firstly, and then install the latest version, the installation file will be updated automatically. CnWizards is licensed under GPL v2.0. This means all of the source codes and the binary files of the plugin toolkit can be freely used and distributed. CnWizards is a Delphi and C++Builder toolkit.
