In this study we present the analysis of the effect of mutations of the apolipoprotein (apo) A5 gene in a large series of French and Australian females. On the basis of our data, the mutation E4 seems to be responsible for low levels of apo A-V in the Australian population (estimated frequency: 11% of normal alleles). In contrast, no significant deficit in apo A-V is observed in the French population.Q: Why are there no PHP/MySQL project sites? I notice that many sites that list PHP and MySQL projects (like this one) seem to be very new. Why is that? When was PHPMySQL conceived? A: When did PHPMySQL (or better used, PHP for MySQL) was designed? PHP Prior to 6.0.0 MySQL was supported via the client/server protocol as a driver. The first versions of PHP were client-only. With MySQL 5.1 both protocols are supported in PHP. PHPMyAdmin is a php/html/mysql access-tool for the MySQL-database. Beginning with PHP 5.3 PHP became a part of MySQL. MySQL MySQL is an open source database system originally written for the Unix operating system. MySQL 5.0 is the first version to support PHP as a driver. MySQL 5.1 is available for both Unix and Windows 0cc13bf012
