If you want to change the default settings, click the little box below the Reset button in the task bar to open the Layers panel (see Figure 2-1). From here, you can change the resolution, black point, and color model. 4. Select Layer on the Layers panel and click OK to close the Layers panel. You can continue working on the file immediately. 5. After you finish your edits, choose File⇒Save or press Ctrl+S (Windows) or
