Amber Isle is a game about living and working in a prehistoric village, inspired by the cute, cuddly, free world of Dinotopia. You are the new shopkeeper in a quaint and friendly village, and you'll need to help new friends and old faces, and discover new recipes, unlock new characters, and run an enduring shop of your dreams! Amber Isle features: - A charming, well-animated dino village - A unique shop management game with a straightforward interface - An easy, intuitive crafting system for creating your own unique items - A diverse cast of characters to meet and befriend - Dozens of custom-created recipes, including some exclusive to this game - Special items inspired by Dinotopia and other wonderful art - An actual 'dino-sized' table big enough for a brontosaurus - Hundreds of localised quests and special items - Shopping, crafting, friendly conversations with Paleofolk and more - Many, many, many, many years of dino-making fun! A world of fantasy and magic where you can create your own roleplaying adventures! With the exciting new 'Take-Control Mode', you can now make your own adventures! How to play the game Start the game by selecting a skill from the left-hand column. The game will automatically select an event from the right-hand column. In addition, a quest icon will appear on top of the screen. The top-left corner shows a list of previously prepared events and quests. Clicking the arrow in this corner will enable the 'Take-Control Mode'. At this point, you can watch a tutorial video or read the short manual. After this, you can choose an event, quest or character. What will you do? It's up to you. In addition, there are two buttons on the top right corner. They are labelled "New Menu" and "Menu Selection". "New Menu" will start a new game. "Menu Selection" will allow you to use a previously prepared'menu' in the game. You can also select a character to start your adventure. You can change your menu selection using the same menu screen. First, you can change the menu. You can choose to select a new menu, use a menu from a previously played game or load a menu on the PC screen. You

Feeling a little bored with the old locomotive? It's time to add trains to your driving life! Life is looking a little dull when it comes to your driving, but here is a chance to make a change. It's not all that easy, though. There's the route to follow, and the trains that need to be moved along it. First, though, you need to prepare for your journey. First, decide how you want to play and if you're going to be the driver or the passenger. If you are the passenger, make sure you have enough money to get your ticket (or any other form of payment for the service). Pay attention to the timetable and plan your journey. There are many different routes and services to follow, so make sure you don't end up too far behind the times. Once you're ready, choose a train that you want to drive and start off. This could be either a normal DB Regio Red-liveried train, a S-Bahn train or a BR training multiple. Think you've got what it takes to drive? Welcome to the internet's most immersive train simulator! It's your job to drive passenger services along a dynamic rail network all day long. It's not all that easy, though. You've got a route to follow, passenger services to collect and drop off, and passenger trains to move in time. Just select your own train, set the route and timetable and get ready to pack your bags for a very long trip. As a passenger, you can choose to catch the next train home, or maybe you're looking for a way to get the latest news or read a newspaper while you're travelling along. Either way, make sure you plan carefully and stay safe. Remember, you'll only have the rest of the day to explore the area with the route map around you, so make sure you're paying attention! Once you're done, it's time to report your findings. It's a busy route, so it would be nice if you had the goods to back up what you say. The more you talk, the more that you get paid. Choose your words carefully if you don't want to be painted as a fraud! Finally, it's all over and you're ready to get home. See you later! Features: • Fully dynamic route map and timetable • Fully detailed driving cab with accurate and realistic handling • Detailed authentic external and internal views of both passenger and freight car c9d1549cdd

IT IS GREAT TO FINALLY BE WITH YOU IN MOST TRAD ATOM RPG: Thrones of Dialdas is a roleplaying game about being a bounty hunter of a particular caliber. It has been a long and drawn out process getting this game to this point, but so many of you were part of that through words, donations, and private chats. This game would not be here if it weren't for all of you. Thank you for what you have done for us. I am thankful that you have indulged in time and talent in helping a kid out. WE WILL BE A LONG TIME AWAITING THE BOOK AND PADDLE BIND MTG TRUDOGRAD: THORNS OF DIALDAS is a dice and file system based Roleplaying Game. It is rooted in custom created Modrons that make up the core rules system, using Open Maptools for creation and publishing to the Web. This has been a huge project and have at times been overwhelming. It has also been our only job for the last two and a half years. This as well as our personal lives are taking an incredible toll. SO.. HERE AS SOME GOOD NEWS.. First off, I will not be doing all of my work off of my phone from now on. This game will get its reward. For now, I will put that energy to making some rules updates, such as changing how modifiers are defined, fixing some of the obsolete rules that have evolved over the last three years, and supporting an indy book I want to support. This of course will mean that IT WILL BE PERMANENTLY FAILING.. My main job is done. I will continue to blog in the mean time about the game, working on future builds, and hopefully tease future projects in advance. But I have many ways to spread the magic. Hopefully, when this went up we would have already made it much further along. If we had started much earlier on than we did.. this would not be coming to you. FINALLY.. USING OFFLINE DIE CODES WILL NOT BE EXPOSED TO GENERAL PLAY If you continue to play the game without knowing what the resources were for that Dragon Egg (ID 3472), You are breaking one of the pillars of this game. NO REDDIT CODE WILL BE RELEASED I have seen the success that reddit has brought for Fate

In Spirit of the Forest, you will play the role of a druid. The game takes place in the tranquil forest environment with a fantasy theme. Players will face challenging combat and other surprises along their journey. There are no pre-made classes and you have to create your own avatar for each quest. Each class you create will have a separate set of skills and

abilities. - You can create your own classes using the class creation system, and the classes do not force you to use them in particular order. A shaman can use weapons and focus on spells. A warrior can focus on melee combat and magic while a ranger can utilize both melee and ranged attacks. - Your chances of success are almost as important as your skill in determining the outcome of the game. - A tutorial will teach you how to find ingredients, prepare your food and drink, use your home and various magical items. - Various quests will lead you to new places, several of which you can explore on your own or with your friends. - No pre-made builds. You will have to adapt to each quest as it comes. - Skills and abilities can be used in a multitude of different ways. Some classes have unique abilities that can be used in 2, 3 or more different ways. - The game features a skill tree system for improved customization. - A variety of battle/combat encounters await. - There are even entertaining escapades for players to have fun. Features -Class creation system -Custom skill tree system -Multiple game worlds -Procedurally generated random encounters and quest maps -Procedurally generated world -Planning/triggering tools -Quality of Life features -Multiplayer function -Extensive fan-based content (hours of work) -Extensive crafting and enchanting system Character Creation The player can create his or her own character. Through the skills tree, the player can choose how to roleplay as a druid. Once a player has completed the character creation wizard, he or she will be presented with a small selection of spells and skills. The player can freely experiment with the skills. The player can also choose how many weapon types and equipment he or she wants. All equipment is engraved with the player's spell formulas and weapons are engraved with the player's healing spells.
