The Amazing Story of Iono Bacon - gliese1337 ===== smooody Before you start getting on board the Bacon bandwagon, read this: As the first point of the abstract states: > It has been suggested that the ability to recognize problems and keep track > of progress is a critical feature of problem-solving ability. However, the > current question is whether, and if so to what extent, this ability is > specific to problem solving. While "problems solving" is a broad enough term that it likely encompasses _any_ difficult task, the study did have to test the subjects on tasks which looked like some problems. --- enohu If you took that paper and created a plane zooming around on top of a map where each different task was labelled, I think you could see a pattern in where people would cluster around tasks. I don't think this is that important a problem though, all of the tasks are pretty similar: working memory and pattern recognition. ----- rglover
