now has more than 100  
million viewers a month, and  
its Twitch Prime membership  
service has more than  
500,000 subscribers. A: This  
is caused by the third-party  
tools used by both the Twitch  
viewer and the Twitch Prime  
service to show Twitch  
avatars, emotes, avatars and  
community items. To fix the  
issue, you need to exclude  
the Twitch account when  
installing the Twitch viewer.

---

Download the Twitch Account Exclusion Tool from Twitch's Android and iOS apps. Select Excluded Accounts. Select your Twitch account and uncheck the account. When installing the Twitch Prime service, go into Account Settings > Account Settings and uncheck the 'Exclude account from Twitch Prime' option. In both cases, the Twitch viewer will no longer make incorrect assumptions about the account being logged into, and the Twitch Prime service will use the correct account.

Invasive fungal infections in patients with heart transplantation. Invasive fungal infections represent one of the leading causes of death in heart

transplant recipients. Clinical management is based on management guidelines of established international consensus but poorly supported by clinical data.

This review aims to summarize the known risk factors of invasive fungal infections and efficacy of various antifungal therapies with special focus on heart transplant recipients. The most serious invasive fungal infection in heart transplant recipients, invasive aspergillosis (IA), is a life-threatening condition with a 3-5% mortality. All patients on chronic immunosuppressive therapy after heart transplantation are at risk of developing an

invasive fungal infection.  
However, patients without  
evidence of IA post-transplant  
have a considerably lower  
risk of IA. Early diagnosis
