Mathematics mathematics [mathematics] is defined as the study of numbers, functions, sets, relations, and structures. Although there are historical precedents, it is not until the mid 19th century that mathematics as a formal discipline is established, by formal definition. Mathematics has been studied by many people and different cultures worldwide. There are various perspectives on mathematics. A methodological perspective on mathematics is in terms of the Axiomatic method. The axiomatic method provides the foundation for mathematics and is a way to define abstract mathematics. A recent perspective is the symbolic, which emphasizes computational algorithms and is related to computer science. Another perspective is the geometric, which emphasizes topics such as geometry, algebra, and calculus. Mathematics has historical connections to the natural sciences. The study of mathematics in its historical connections to the natural sciences led to the development of the fields of physics, astronomy, and biology. Mathematics is related to other areas of study such as geometry, physics, astronomy, number theory, algebra, analysis, calculus, statistics, programming, philosophy, and topology.
