you then get on and do something useful with the guests - organise a party, a disco, or go on a stag night - and get on with the real business of turning a profit. this is not an extremely complex process, but it does involve a fair bit of fiddly management, and there's a fair amount of messaging going on. you can also hire a chef if you want to eat in style, or put a pool in if you want to keep your guests off the beach. there's a fair amount of grinding involved, but it is almost completely passive. you can also decide whether you want to give the place a makeover, or to have a clear out. in each case, it's a matter of making decisions about the location, the time of day, and what your guests want, and then having a go at it. the results may not be always exactly what you wanted, but it's fun, and you don't have to be a genius to see how to turn it to your advantage. at the end of the day, however, it's about the fun, and beach life is never short on fun. it's easy to play, it's easy to learn, and it's hard to get bored of it. you can also put your guests up for adoption, and let them have babies. these babies can then be given a job, and they can be put up for adoption as well. if you want to have a baby, you'll need to be at least 14 years old, and you'll need to have been around for at least three years. you can't have more than three children at any time, but you can have as many as you like, and that's more than many of the other tycoon games manage. there are 12 islands on which you can build, and they're all quite detailed and well designed. some are better for domestic use than others, so there's a lot to think about. in the end, however, the big draw of beach life is the number of guests you can have, the number of jobs you can employ them to do, and the number of babies you can have. it's a surprisingly deep game.

in beach life, you can choose to play either the story mode or the sandbox mode. in the story mode, you start with a small island with a few guests, and you have to manage it until you reach a certain level. when you have finished building your resort, you can place it in the game, and then you can invite guests to check out your hotel. the game features different activities for the guests, such

as the beach bar or the casino. the guests can enjoy these activities, and they can even buy souvenirs and souvenir t-shirts at the gift shop. beach life is a great game for children and adults alike. you can play it for free, or you can buy virtual currency from the game, and then you can buy additional items. you can also unlock more content, such as additional island locations, additional theme parks and more. this game is compatible

with both windows and mac computers. they may be a bit on the nose, but their stories make for some of the game's best moments. the four new islands have their own distinct challenges, and, as well as the beach-based quests, there are also new activities to be found in the back of the resort. this week saw the launch of the new annual best of british awards, and the so-called "pop-up" shops, which are the new thing, were all abuzz with the

promise of free samples of everything. last year, when the sims became the recipient of the best franchise award, the self-congratulatory cries of "sims make the best videogame" rang out. this year, we have beach life, a game about people, and the judges have awarded it the best franchise award. probably because they had to think of something. if the public really, honestly, thinks these things are the best, there is an

extremely worrying message to be taken from that. maybe we should start having people like the american president take the best videogame awards on a fact-finding tour of the uk. it would be an interesting project.
