March 1, 2012 - CSA S806-12 - 03/03/2012 Design and construction of fiber reinforced polymer building structures. Report now! ... Download PDF 1. 01 Mb At the moment, we are actively working on the implementation of a plant project in China for the production of fiber-reinforced polymer building materials. Today, our production concept includes the use of high-tech equipment and advanced technologies, and is one of the most modern in the world. Our plant will produce building materials made from polymer film using the latest technical developments. dd2bc28256
