All processor effects can be applied to MIDI (accelerated), USB keyboard (accelerated), Line, Microphone, Aux. 1, or Aux. 2 inputs and outputs (except the Multiband effect). The Babyface Pro provides eight faders and four sliders, so an unlimited number of parameters can be adjusted, all with easily accessible keyboard shortcuts. The Tascam US-2020 features eight Tascam Ultra-HDDA microphone preamps (EIN-125 dBu), 20 dB of headroom on each line and microphone input, with an additional 20 dB of headroom on all other inputs, and 20 dB of headroom on the outputs. The US-2020 also features a four-band, 30-dB master EQ with a -30 dB cut and boost from 100 Hz to 12 kHz. An 8kHz Filter is provided by the S/PDIF filter. Nine-band Compression is also available, and the unit's master controls include Drive, Resonance, Compression, Q, and Ratio. The four XLR and two TRS outputs are configurable, and each input offers ±10-V phantom power. All inputs and outputs can be configured as either line or phantom level. You can use a specific track or microphone to send your sound in or out via the 20 input and 20 output connections. The rear panel includes XLR and 1/4-inch TRS connectors, and one stereo 1/4-inch input and one stereo 1/4-inch output that can be connected to a computer via USB 2.0. There are also two multi-function I/O jacks, one 1/4-inch TRS, and one XLR, that support iPod/iPhone loading. Image-Line offers two 12-volt power supplies to power the mixer when connected directly to an AC power supply or a power strip. This also prevents the mixer from accidentally switching to battery mode if unplugged from AC power.
