Windows 7 Recovery Disc 32-Bit (x86) Edition.iso

Download

Hello Well my goal was to do a clean format and reinstall windows to factory setting. I had done that before with the Windows 7 recovery disks that I burned when I first got my Asus laptop. But this time I could not find the recovery program, being fraustrated I tried to restore it using the F9 key, it wanted to restore by making a system image, and then it ended up overwriting the harddrive. Now windows will not boot at all. It goes to a black screen asking for media to boot. Now the question is will your software help me Also can I still format and reinstall windows to a clean state Tip: The reason we have merged the 32-bit Windows 7 into the 64-bit disk and not the other way around is to enable the recovery boot options for a 64-bit Windows. As most Windows installs are likely to be 64-bit it makes more sense to to it that way round. The 32-bit recovery options do not work on a 64-bit system and you get the below error. If you want to have both on the same disk use WinAIO Maker Professional which can do it at the click of a button. To create an all in one ISO image click the AutoAIO button, browse for a working folder where the ISO will be created, then add both the x86 and x64 Windows 7 ISOs. The ei.cfg file that restricts the versions on the disk will be automatically removed during the process. The Enable x64 recovery mode option is useful because without it you wont be able to use the Windows recovery options on a 64-bit system. Checking the box will create a boot menu with the 64-bit option added. Click Start Compilation and wait a few minutes for the ISO to be created.

Windows 7 Recovery Disc 32-Bit (x86) Edition.iso
