Evaluation of the cytotoxic properties of nano- and micro-particles, loaded with curcumin and flavonoids, against human epithelial cervical cancer cells. Cervical cancer is one of the most common malignancies in women around the world. Development of chemopreventive drugs that could be used to treat cervical cancer are urgently needed. The aim of the current study was to synthesize and evaluate the cytotoxicity of nano- and micro-particles loaded with curcumin and chrysin, against cervical cancer cell lines. Cells were treated with various concentrations of these particles and viability was measured. Particles were characterized by scanning electron microscopy and particle size distributions were calculated by photon correlation spectroscopy. The release rates of curcumin and chrysin were determined and cytotoxicity effects were evaluated using the MTT assay. Different cell types were used: cervical cancer cell lines (Hela and SiHa) and cervical normal epithelial cell lines (HBL-100

Comes with a straightforward wizard-like UI Only that four of the five steps included in the app are actually designed to prepare you for the repairing process, so each time you're advised to either clean your system in case any infection exists on the local disks, check file system or create a backup. Includes a basic and an advanced mode The last and the most important step provides a total of three Windows repair modes, namely basic, advanced and custom. While the basic mode runs only basic repair options and the advanced one comes with more complicated utilities, the custom version lets you pick exactly the things you need to fix. For example, you're allowed to reset registry and file permissions, repair Windows Firewall, Internet Explorer and the HOSTS file, fix icons, proxy settings, Windows Updates and Windows Sidebar, remove temporary files, unhide non-system files, register system files or set Windows services to default startup. Although it may sound like a waste of time, it's crucial to create a backup before attempting to fix certain errors, just to be sure no harm could be done to your system. An all-purpose repair tool for users of all experience levels Simply put, Windows Repair is an easy to use and effective utility that serves its purpose in a way that makes it appropriate for all types of users. Windows Repair - 0.1.0.0 This easy-to-use application can fix several problems in Windows like Windows startup issues, Windows logon/logoff issues, missing application and hardware drivers, corrupt registry keys/files, etc. The program comes with a friendly user interface and can be managed using a wizard-like approach. My second choice to MSConfig. For a very long time I searched for an application that could do exactly what MSConfig can, but I found none, so I decided to create one. I know that few applications can do exactly what MSConfig does, but none of them can be compared with MSConfig, so here is the application that does exactly what MSConfig does.
