While the app's interface is new, it's still pretty well designed. The screen on the left accommodates the various tools I use most frequently to make adjustments to a source image. The right side shows the tools currently on any document I'm working in, so I can pick up where I left off without having to click through each layer to find what I last edited. Photoshop CC for iPad makes it easy to work with the traditional desktop workflow. The app supports adjustments like exposure, curve, levels; selections; adjustments for color, blackpoint, saturation, sharpness, and grayscale. As in the desktop version, the Workflow feature appears in the status bar. This allows quickly strip all editing tools out of the active document. LinkedIn is the professional's professional.
