Photoshop Paste Into let's you quickly paste artwork from other applications such as After Effects or Illustrator and place it in Photoshop — in just a few clicks. To paste artwork from a browser, go to Edit > Paste and click Paste into Photoshop. With Layers, you can paint the elements comprising your artwork using defined colors or shades of gray. Then create groups, which organize the Layers based on how you intend those elements to be used (placed or removed). Once you've created your groups, you can manipulate the Layers to position them based on your project design. So, for example, say you need a logo to appear at the top right-hand corner of a website landing page. You create the logo, then create a group called Navigation for the Layers. The Navigation group sits between the background and the logo. You can now move the Navigation group into the proper position for your web design. e3d0a04c9c
